

## **Data-binding and Directives**

“ng-app” to html

“ng-model” to search box with projectSearch value

{{ projectSearch }} to the display area

“ng-show” to projectSearch container

ng-init=”data=[‘Task1’,‘Task2’]” to body

ng-repeat to table row

## **Filters**

“ | filter:projectSearch ” to table row repeat

## **Modules and Controllers**

Remove ng-init

Add new script tag

Create new angular module

Create new angular controller

Setup new module and ng-controller

Fix ng-repeat to include the properties

“ | orderBy:'name' “ to table row repeat

Use currency filter on the budget of projects “ | currency:'£' “

## **Factories**

Add api factory

Apply factory to controller
